Carry On

CARRY ON

Carry On is a portable seating solution that works perfectly by itself but also as a complement to other products. Today we work more in projects and need environments that can be easily adapted to different needs.

Carry On is not only physically flexible; it also signals to the user how it should be used by the handle on top. Carry On has round but simple forms and combines traditional materials and craftsmanship with contemporary design and functions. It gives a tailored impression with stitching that communicates good craftsmanship. It is easy to stack Carry On, which means that it does not have to be stored elsewhere when not used.
